

The AI tech Company

Self-Machine-Learning Platform™

We have developed a trailblazing & unique Self-Machine-Learning Platform™, which reveals & predicts companies' true behavior in real-time.

Data alone is not the key. That is why our Self-ML Platform™ is disruptive by looking beyond data. It is how data is connected with digital signals, triggers, and clues that establish accuracy in all our predictions.

Your All-in-one data scientist

- PaaS
- Ready-to-use
- Automation
- Own database (all types of data)
- Personalized
- Precise insights
- Real-time
- Transparent
- True behavior of companies
- Feedback loops

Who are we?

AxonJay is an AI startup born in the year of the pandemic. We believe in disrupting the status quo for the greater good and doing things differently. We are inspired by nature (biomimicry) and produce AI with a purpose.

We refer to ourselves as a tribe because we work with a common mission and a set of shared values :

Dare to disrupt

Innovation

Co-creation

Trust

Sustainability

Our mission is to make AI and machine learning more accessible and easier to use for every organization to help you disrupt your Business and enable sustainable change.
